

## Tamfourhill Walk

### Tamfourhill

These two very short paths are well surfaced and suitable for disabled visitors but getting to them is difficult from the housing side of Tamfourhill Road as there no protected crossing or dropped kerbs available. More extensive views of the 'Wall' can be seen further along and on the other side of Tamfourhill Road but these surfaces here are unsurfaced and steeper. (20mts/80mts)

This route covers two small sections of the Antonine Wall and both sites can be found directly adjacent to Tamfourhill Road to the south of Camelon.

Both these walks are along surfaced stone paths but there are no other facilities except those in Camelon. Wheelchair access is difficult from the main road which can be quite busy and there are no clear crossing areas over the road.
